PA & MONITOR SYSTEM

FIRST AND FOREMOST

We play lots of warm, classic music on vinyl and therefore we prefer not to play on digital sound systems. We love classic, analog sound systems like GARY STEWART AUDIO add EAW, MEYER and TURBOSOUND, and really hate when a system has too much digital processing and/or compression and limiting. We promise to respect your system and not play in the red, but great DJ set requires teamwork so we need a qualified sound professional on-site for soundcheck and during our set.

ALSO: WE PLAY VINYL. NOT SERATO OR TRAKTOR. SO IT'S VERY IMPORTANT THE TURNTABLES ARE PROTECTED FROM FEEDBACK. THIS CAN BE ACCOMPLISHED A NUMBER OF WAYS, BUT PLEASE MAKE SURE THE TURNTABLES ARE TESTED AT A LOUD VOLUME WITH NO FEEDBACK.

SECOND AND SECOND MOSTLY

NO SELF POWERED MONITORS. We need 2 x full range monitors, 1 left and 1 right, at chest to head level plus 1 x subwoofer in the DJ booth so we can feel the bass. Monitors must have a dedicated amplifier and be controlled through the monitor output of the DJ mixer.

THIRD AND SOMETHING OR OTHER

When it comes to clubs we're not into high stages and lots of lights. For club gigs the maximum stage height is 1' (1/2 meter) and we require a large disco ball with rotating motor mounted in the center of the room, illuminated by 1-2 white pinspot lights controllable from the DJ booth. Usually a well placed and lit disco ball is enough, but when other lighting is necessary please note that we prefer solid reds and purples and don't like lots of flashy intelligent lighting. All other lighting, video art and VJs must be pre-approval by us and/or our management. We also require a lighting technician on-site for the duration of our set.

≡ DJ ≡ EQUIPMENT

•MIXER (ETCvvv)

- Rane MP2015 or other rotary mixer
- Pioneer EFX1000 (NO RMX1000, MUST BE EFX1000).
- High end 3 band isolator (not necessary with MP2015)

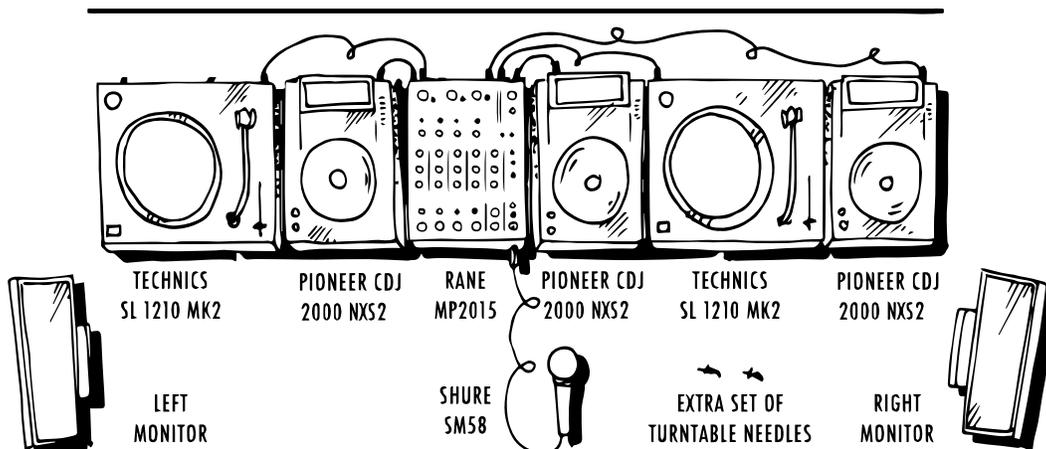

•TURNTABLES - 2 x Technics SL1200/1210s (in good working order, with vibration dampening so there's no feedback. Yes, WE PLAY VINYL!)

•CDJS - 3 x Pioneer NXS2s linked and connected via RCA (NOT DIGITAL)

•MICROPHONE - 1 x Shure SM-58 plugged directly into DJ Mixer (yes, we do use this).

•EXTRAS

- 1 x set of working turntable needles
- 2 x link cables for the CDJs (IMPORTANT)
- 1 x Y cable (RCA - 1/8" minijack)
- 1 x mechanical fan in the DJ booth (to keep us cool and blow the smoke away)

PLEASE NOTE We use the turntables for vinyl and USB sticks with the CDJs. Turntables plugged into 1 & 4. CDJs plugged into 2, 3 & AUX via RCA
