

# Soul Clamp RIDER

Dance music was born as a subversive movement of marginalized people and therefore we believe it's our duty to follow in their footsteps to encourage positive change for our communities and our planet. This rider lays out some concrete ways that we all can help push these values forward through music. We understand that it is not yet possible to be completely eco-friendly and inclusive in this industry, but through communication and requests below, we hope that we can develop a greener and more equitable way of touring.

- We are supporters of the Bye Bye Plastic initiative, which aims to reduce the use of single-use plastics at clubs, festivals and music events. <http://byebyeplastic.life>
- We request all lineups are at least 50% female identifying / LGBTQ+ / BIPOC / culturally diverse / disabled. For club shows, we request any opening DJs are also from these groups.
- We are always working to minimize our carbon footprint from travel by not taking one-off flights to gigs, taking trains for less than 6 hour trips and establishing routing corridors. We hope that you also consider booking local or regional DJs whenever possible.

If you disagree with a request, or if you are unable to deliver, we ask you to contact us. We will find the best solution together. If you have any good suggestions, additions to this rider, please share them with us. In this way we can continue to learn and grow towards a better world through music.

# Technical Rider

PLEASE NOTE, WE REQUEST A 3 HOUR MINIMUM SET TIME FOR CLUB SHOWS

## PA & MONITOR SYSTEM

### PA:

We love classic, analog sound systems like GARY STEWART AUDIO add EAW, MEYER and TURBOSOUND. We promise to respect your system and not play in the red. A great party requires teamwork so we ask for a qualified sound professional on-site for soundcheck and during out set.

### Monitors

2 x full range monitors, 1 left and 1 right, at chest to head level plus 1 x subwoofer in the DJ booth so we can feel the bass. Monitors must have a dedicated amplifier and be controlled through the monitor output of the DJ mixer.

### Lighting

Usually a well placed and lit disco ball is enough. Bonus when it's lit with pinspots controlled from the DJ booth. For other lighting we prefer strobes reds and purples, not so much flashy intelligent lighting. SMOKE MACHINES ARE ALSO COOL.

### Visuals

When there is the option we have custom Soul Clap visuals. We can provide either a long format looped video or individual clips for a VJ. *Standard resolution is 1920 x 1080, please notify us with your specs so that we can confirm this or render otherwise to fit your screen.*

## = DJ = EQUIPMENT

2. Rotary mixer such as E&S, Bozak, Rane, Condesa, Urei, etc... (please also provide a Pioneer EFX1000 with all rotary mixers)

### CDJs:

**FOUR CDJS FOR LARGER FESTIVAL STAGES**

1 x ethernet hub to link CDJs, 1 x Y cable (RCA - 1/8" minijack)

Soul Clap is a supporter of the Bye Bye Plastic initiative, which aims to reduce the use of single-use plastics in clubs. Where possible, please avoid using plastic straws, bottles and cups in the DJ booth. If, like us, you find this important you can call the Bye Bye Plastic Hotline, an organisation who will help you explore local plastic alternative options for your entire event or venue.

They have already done all the homework on suitable greener solutions. Hotline contact: [change@byebyeplastic.life](mailto:change@byebyeplastic.life)
