CLASSIC VIBES, NEW WAVES

Life on Planets is the story of a seeker; singer/songwriter Phill Celeste. He began making tracks in the warehouses of the underground Baltimore scene, spreading messages from the stars through the airwaves, courtesy of Wolf + Lamb, Soul Clap, Double Standard, Sub Urban Records and Crew Love. From the streets of Baltimore to stages on Caribbean islands, dark cavernous clubs, cities draped in night and beachside festivals drenched in golden rays; his eclectic sound has been influenced by artists, tribes, and dancers in every arena. Combining sultry lyrics with passion filled guitar licks and thumping beats, Life on Planets melds r&b, hip hop, soul and house to weave surreal tales of wonder, bringing fresh awareness and consciousness to every dancefloor. Join the quest for the perfect vibration as he takes his caravan around the globe.
